WHAT TO LOOK OUT FOR IN YOUR BIRTH CHART TO DETERMINE SUCCESS AND CAREER

Introduction

Why and how knowing your birth chart can help you in life – tracing not only where success and abundance are likely to happen for you, but how to navigate challenges, avoid struggle, and tap into your true path.

When you were born, the stars and planets were in a very unique position in the sky. Impacting your journey with special energy, gifts, and challenges for your life path ahead.

This is amazing news because it means you can tap into your birth chart to get valuable insights about your personality, behavior, and talents. It can also reveal which career path will lead you to success, abundance, and fulfillment in your life!

Now, this is not a simple matter of luck. Being successful and leaving your mark on history most often requires effort and commitment. However, it is easier to feel inspired to follow a particular direction when aligned with our natural skills and preferences.

Choosing a career is one of the most crucial decisions in our lifetime! Some people know from an early age what their passion or dream job is, but most of us often wonder what would be the right choice for our lives.

Trying to find professional success in a career dictated by your parents or society often causes feelings of inner emptiness and struggle. Even if we achieve “success” in outer terms, we can end up feeling blocked and in struggle internally.

But when we instead listen to our inner compass and follow the path our soul longs to pursue, we feel blessed on the inside, and we also tend to feel more motivated and our path opens wider in our life and career.

If you find yourself lost and don't know where to go, your birth chart will ALWAYS show you the map of your inner self.

This map will reveal those scenarios and professions that will guarantee success, happiness, and fulfillment in your professional life.

In this report, you will learn about the most significant career indicators in your birth chart!

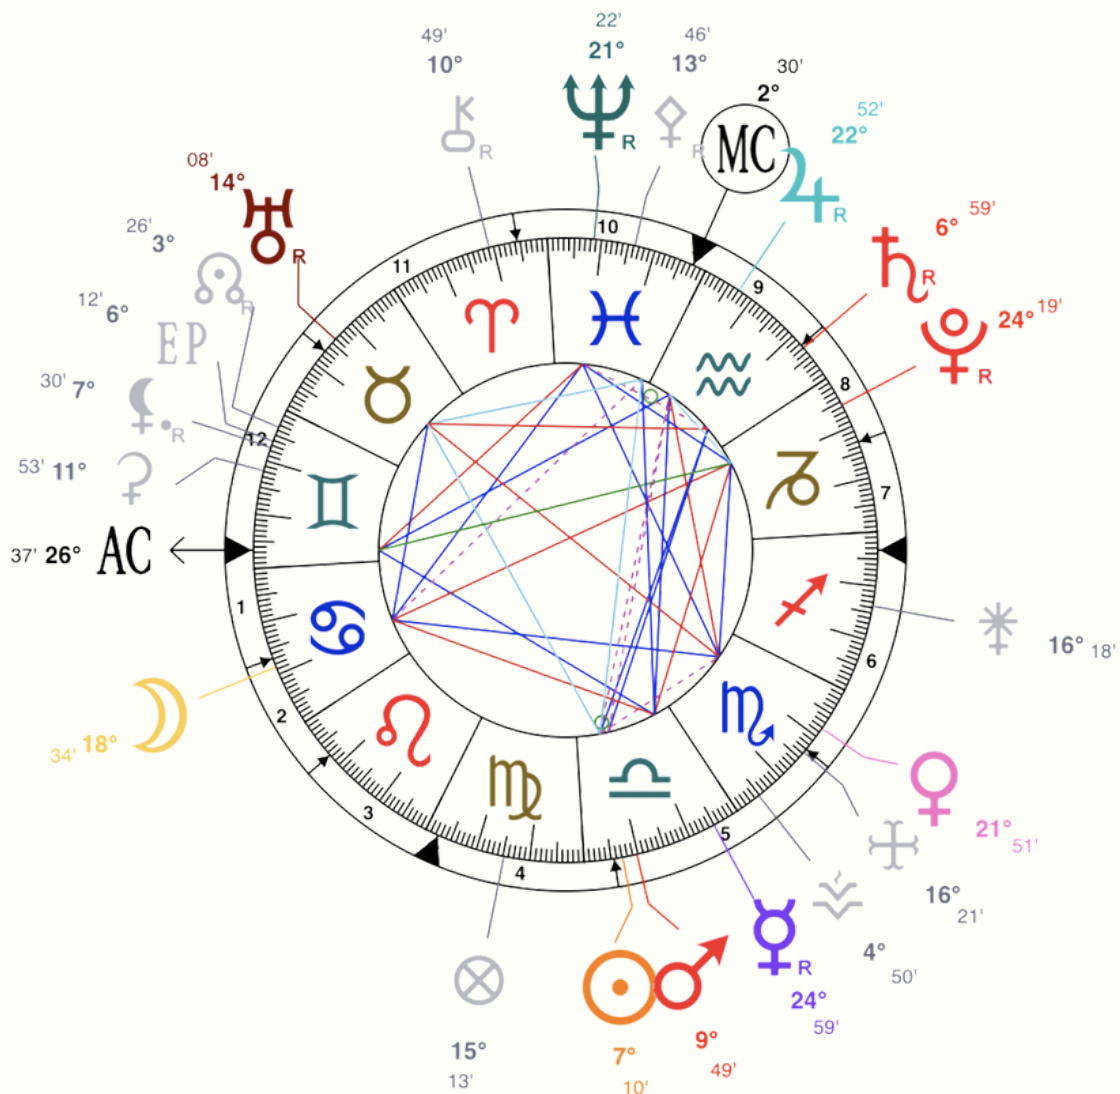

So you can avoid struggle and delays, tap into your true soul purpose and gifts, and learn to navigate life with more ease! For better results, success, and abundance. Because when we follow our truth, as outlined in the birth chart, we tend to experience it as if the universe is supporting us. Things open up. Opportunities show up.

Whereas when we’re “fighting our true nature”, we tend to feel stuck and blocked. So let’s tap into your unique gifts and traits!

First, go here and put in your date and place of birth. If you do not know your exact time of birth, use 12pm – however, know that the information about houses will not be specific to you if so. For best results, find out your birth time, at least approximately.

HOW TO DISCOVER YOUR CAREER/SUCCESS PATH

When focusing on your professional life, check house 2, 6, and 10. In addition, planets like Jupiter, Saturn, and Venus can also guide you in the right direction.

What to look for

Finding your ideal career is not easy. However, from an astrological perspective, there are several factors to look for in your birth chart that points out which field or activities you'll do great in.

It is also essential that these activities serve a rewarding purpose and bring you long-term fulfillment, so you should evaluate your strengths and weaknesses.

I identify the activities that have the potential to turn INTO your dream job, as there may be untraditional options that serve you best.

Of course, there are countless options available, and all work fields are constantly evolving, just like our soul and life journey. Still, your birth chart will serve as a basic guideline to know where to start. The point is not to obsess about a single outcome, but to inspire you to take the first step in the right direction.

These are the most important factors for success and career based on your natal chart:

- Each sign's natural tendencies in career/success
- The Midheaven and its ruler in the natal chart
- Earth houses (the 2nd, 6th, and 10th)
- Jupiter's placement and interactions
- Venus' placement and interactions
- Saturn placement and interactions
- North Node

1) The Midheaven and its Ruler in the Natal Chart

The 10th house or Midheaven (MC) represents what you aspire to become, just like the top of a tree. The midheaven is the most relevant house to check to determine the type of activity where you will climb the career ladder.

The ruling planet of the midheaven takes equal importance since it will give you hints of the way you'll leave a mark in this world.

For example, suppose your 10th house cusp is in the sign of Pisces. In that case, you might develop a career in an empathic activity related to your spiritual path and providing a service to the less fortunate. It can also deal with film and entertainment, transcendence, and the unconscious.

Now, suppose the ruling planets of Pisces (Jupiter and Neptune) are in your 7th and 9th house, respectively. In that case, you can thrive together with a partner and work abroad or in educational settings, for example.

Also, planets conjunct the Midheaven are significant career indicators, and every plane aspecting this angle. For example, people with Uranus-midheaven aspects will crave a unique, creative life path away from traditional alternatives.

If Saturn interacts with your Midheaven, responsibility, time, and effort is involved. This would indicate a long and steady building of your career, rather than overnight success.

2) Earth Houses (the 2nd and 6th)

The second house talks about your finances, resources, and savings. This is the natural house of Taurus and displays those things that we value and enjoy.

This house shows how you manage money and what activities will bring you enjoyable income. For instance, if you have Mars in the 2nd house, you probably relish making money through independent ventures and excitement.

3) Jupiter's Placement and Interactions

Jupiter is considered the greater benefit of the zodiac. It symbolizes abundance, fortune, and wisdom, pointing to the meaning we give to our life.

The house, sign, and aspects of Jupiter show which path will bring expansion and passion to our lives and those areas where we will feel fortunate and everything goes smoothly without effort.

Jupiter also indicates your philosophy and world views, perception of wealth, and travel experiences.

This planet speaks of those risks we are willing to take based on our intuition rather than actual facts.

For instance, if you have Jupiter in Cancer, you will likely experience expansion and growth in your heritage, traditional pursuits, and family history. Thus, exploring those areas will bring success and fulfillment to your work life without struggling that much.

4) Venus' Placement and Interactions

Venus represents sensuality, taste, and preferences. This planet reveals your personal value and your relationship to finances and material possessions.

Venus is all about pleasure, and its positioning indicates which businesses will bring you profitable growth and how you enjoy spending your earnings.

For example, Venus in Libra suggests a natural talent for financially rewarding work in music, fashion design, or public relations. If Venus is also conjunct Pluto, these activities will take on an intense and provocative note, broaching taboo subjects and inviting others to delve into their dark side.

5) Saturn Placement and Interactions

Saturn governs commitment, structure, hard work, perseverance, and maturity. These qualities are essential to success in whatever work path we decide to pursue, so their position in our natal chart signals our professional ambitions.

We will work hard in this area, but we will reach the top of our game. For example, if Saturn is in Leo in your birth chart, you can build a career in a creative field that expresses your true identity.

6) North Node

Our career choice does not always match our life purpose. However, your work will be far more rewarding if these two align in some way.

The North Node signals where your soul is headed for self-realization. The lunar nodes are connected to karmic tasks and those lessons we come to learn in this life. The house it is in and the sign and its aspects will describe where you can grow the most. Therefore, it can give some valuable hints about where you should direct your career.

For example, if your North Node is in your 3rd house, your soul will evolve through communication and writing. If your North Node is in your 12th house, it will be through introspection and work with the unconscious.

A CHALLENGING CHART DOESN'T MEAN SUCCESS IS BLOCKED IN YOUR LIFE

No one is exempt from finding fulfillment and success in their professional life. Some planetary positions may be more challenging than others, but this is just an opportunity to master all those lessons and thrive in your career path.

These types of charts are an invitation to unlock their hidden gifts and become even more successful than nobody could have ever imagined.

Famous examples

Oprah Winfrey

Let's take Oprah Winfrey's birth chart as an example.

This famous entrepreneur/television personality has Saturn, the challenging planet of commitment and hard work, in the 10th house, the ruler of our public development, in square to Venus, the planet that governs our finances.

An untrained eye might say this person will never be financially successful and definitely spend a lifetime in poverty. However, we can prove this is quite the opposite! Oprah has been ranked the richest African-American person of the 20th century.

Of course, things didn't come easy for this American talk show host, television producer, actress, author, and philanthropist. But it all paid off! Her family always struggled with their circumstances her whole childhood. Being a poor, black girl in the '60s, nobody would have thought she would ever succeed.

However, this Saturn square to Venus only displayed Oprah's determination and tremendous strength of personality. That's why she never stopped working hard until she achieved the success she enjoys today.

Tony Robbins

The same goes for the story of Tony Robbins, the famous businessman, author, and philanthropist who has an opposition between Venus, the planet that rules our finances, and inconsistent Uranus.

He also has Saturn, the planet of challenges and hard work, square to the sensitive Moon.

One could say that some unpredictable situation will abolish any attempt at success and that he will live his whole life striving in vain to have a stable professional career.

Tony Robbins was born poor and had a rough childhood, and he started out as a broke janitor in his working life. However, he decided to invest his salary in a seminar that helped him develop a coaching style that made him famous and catapulted him to success.

Warren Buffet

Warren Buffet's natal chart is filled with and all kinds of challenging aspects, among them Venus, the planet that rules our financial success, in square to Pluto, the ruler of profound transformations and regeneration.

But this didn't stop Warren from becoming one of the wealthiest American business magnates, investors, and philanthropists. Pluto gave him the determination and resilience to rely on his talents and invest until he found success.

Lionel Messi

And even Lionel Messi, the world's most famous professional footballer, presents challenging aspects in his natal chart, as the Moon and Venus opposite Saturn.

This player was diagnosed with a growth hormone deficiency, which brought him several problems during his career. He was also rejected from different famous football teams, but he kept on training hard until becoming the most renowned player in the world.

SUMMARY

Several astrological factors are taken into account when determining what type of career can bring happiness and fulfillment to an individual.

Among them are the Earth houses zodiac signs and planets, the Midheaven and its ruler, Jupiter, Venus, and Saturn, and the North Node. However, career success is not determined by these planetary positions.

As we have already learned, some people have challenging positions in their natal chart but still overcame their obstacles and become the most successful personalities in the world. And then we have other people with highly favorable planetary positions who do not take advantage of their potential.
